ABOUT ME

I am a professional graduate passionate about technology and the development of innovative solutions. I am focused on specializing in Full stack improving and maintaining robust, scalable and efficient systems. My goal is to gain experience in Industry 4.0, explore new emerging technologies and continue to improve my knowledge in frameworks, modern libraries for the development of responsive applications. I enjoy facing new challenges, working in multidisciplinary projects to bring value through technology and provide creative solutions that not only solve problems efficiently, but also generate long-term strategic value.
